

MD ATIF AZIZ

Full-Stack Developer | Laravel · PHP · React.js · Vue.js/Nuxt.js · Node.js · TypeScript

+880 1931-117567 • mdatifazizfahim@gmail.com • [GitHub: AtifAziz600](#) • [LinkedIn](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Full-Stack Developer with 1.5+ years of professional software development experience building and maintaining production-grade web applications using Laravel, PHP, React.js, Vue.js, Nuxt.js, Node.js, TypeScript, and MySQL. Delivered multiple live platforms, including a multi-vendor e-commerce marketplace, a B2B industrial supply platform, and an AI-powered learning system, with hands-on expertise in RESTful API design, Eloquent ORM, JWT authentication, role-based access control (RBAC), and relational database design. Strong foundation in MVC architecture, object-oriented programming (OOP), and Git-based collaborative workflows. Currently developing production features at MM IT Soft while pursuing an M.Sc. in Computer Science and Engineering at BRAC University.

TECHNICAL SKILLS

- Programming Languages:** PHP, JavaScript (ES6+), TypeScript, SQL, Python
- Backend Development:** Laravel, Node.js, Express.js, RESTful API / REST API Design, MVC Architecture, Eloquent ORM, API Integration, Authentication, JWT, Role-Based Access Control (RBAC)
- Frontend Development:** React.js (ReactJS), Next.js, Vue.js (v2 & v3), Nuxt.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Web Design, SPA, SSR
- Databases:** MySQL, PostgreSQL, MongoDB, SQL Server, Database Design, Schema Design, Query Optimization
- Architecture & Practices:** Software Architecture, System Design, Component-Based Architecture, OOP, Clean Code, Code Review
- Tools & DevOps:** Git, GitHub, NPM, Composer, Vite, Postman, VS Code, Cursor
- Mobile:** React Native, Expo, Flutter, Dart

PROFESSIONAL EXPERIENCE

MM IT Soft	July 2026 – Present
<i>Software Developer — Laravel / Full-Stack Development</i>	Dhaka, Bangladesh
- Develop and maintain production web applications using Laravel, PHP, MySQL, RESTful APIs, JavaScript, and modern frontend technologies. - Design and implement backend features using Laravel MVC, Eloquent ORM, migrations, validation, authentication, authorization, and business logic. - Develop and integrate RESTful APIs to support frontend applications and business workflows. - Design relational database structures and implement efficient, optimized database queries for application features and business requirements. - Build reusable and responsive frontend components and integrate them with Laravel backend APIs. - Implement secure authentication and role-based access control (RBAC) for application users and business workflows. - Analyze existing application architecture, debug production issues, optimize application logic, and deliver maintainable software solutions.	
Freelance & Independent Projects	December 2025 – Present
<i>Self-Employed Full-Stack Developer</i>	Remote
- Continuing active development on personal and client projects, deepening expertise in Node.js, Express.js, and advanced full-stack architecture patterns. - Contributing to open-source repositories and portfolio projects on GitHub.	

- Engineered 3+ production web applications using Laravel (MVC) and Vue.js/Nuxt.js, delivering RESTful APIs, JWT authentication, and role-based access control (RBAC) for multiple simultaneous live client projects.
- Led the full-stack build of the Apagor e-commerce platform (apagor.com): product catalog, dynamic product pages, cart/checkout pipeline, order management workflows, and merchant admin dashboard.
- Delivered SEO-optimized Nuxt.js SSR websites for B2B clients (Noor Alam Machineries), improving core web vitals, page structure, and organic search discoverability through server-side rendering.
- Integrated Vue.js frontends with Laravel REST APIs for full CRUD operations; enforced parameterized MySQL queries, input validation, and secure session/token handling to help prevent SQL injection and data breaches.

- Developed responsive and interactive frontend components using React.js, JavaScript, HTML, and CSS for an active e-learning platform.
- Developed interactive interfaces for e-learning modules, quizzes, and course-related features.
- Collaborated with senior developers through Git-based workflows, code reviews, debugging, and sprint development.

KEY PROJECTS

Apagor — Multi-Vendor E-commerce Marketplace — apagor.com

Laravel · PHP · Nuxt.js · Vue.js · MySQL · Tailwind CSS · REST API · JWT

- Developed a multi-vendor marketplace supporting seller onboarding, product catalogs, category discovery, shopping cart, and ordering workflows.
- Designed relational database structures for products, product variants, sellers, inventory, and transactions; implemented JWT-based authentication.

CogniPath — AI-Powered Learning & Career Platform — cognipath.net

React.js · Next.js · Node.js · Python · LLM API Integration · REST API

- Built role-based dashboards (student/instructor/admin), dynamic course/quiz rendering, and SSR-optimized Next.js pages.
- Integrated AI/LLM functionality into personalized learning and career-pathway workflows.

Noor Alam Machineries — B2B Industrial Supply Platform — nooralammachineries.com

Laravel · Vue.js · MySQL · REST API · Advanced Search · RFQ

- Developed a B2B machinery catalog and dealership platform with advanced multi-faceted search/filtering and real-time stock availability.
- Built a Request for Quotation (RFQ) workflow for business customers and a secure admin portal for RFQ tracking.

Salsabil Publications — Publishing & E-commerce Platform — salsabilpublications.com

Laravel · Vue.js · MySQL · Eloquent ORM · REST API

- Developed an educational publishing platform supporting book catalogs, curriculum resources, shopping cart, and online ordering.
- Designed and optimized MySQL database architecture for book inventory using parameterized queries and structured Eloquent ORM relationships.

XAI Intelligence Workspace (Work in Progress) — xai-prdduct.vercel.app

AI Workspace · Particle Animations · Dark Glassmorphism · Live Analytics · Data Workflows

- An advanced AI-powered intelligence workspace platform featuring interactive particle animations, dark glassmorphic styling, live analytics, and structured data workflows.

EDUCATION

- Focus: Computer Science, Software Engineering, Cybersecurity.
